

Refurbished Compact Dynamometers Model D1500

Currently there are several previously owned Model D1500 dynamometers in our inventory. When refurbished these dynamometers provide excellent value, can be on site in a short time frame, and will be in like new condition. Depending on your needs, refurbishment can include modified test enclosures, altered inertia range and the addition of optional equipment to permit any number of applications from noise measurement to environmental control.

The refurbished dynamometers will be checked for proper operation and employ the state-of-the-art ProLink software package for control, data acquisition, analysis, and reporting. Within the range of the options selected, the refurbished dynamometer will operate like a new unit with a full one-year warranty on all refurbished components.

Typical specifications for the units on hand are shown. We encourage you to contact us as soon as possible to determine how one of these dynamometers can be configured for your needs. We would be pleased to provide a quotation with detailed capabilities, timing, and performance specifications. Pricing and delivery are dependent on the necessary refurbishment and modifications required.

For more information, contact LINK at (734) 453-0800 or sales@linkeng.com.

Typical Specifications	
Inertia Range	Minimum: 10 kgm ² (7.37 slug-ft ²) Maximum: 130 kgm ² (96 slug-ft ²)
Maximum Speed	1500 rpm
Main Drive Motor	56 kW (75 HP) DC
Torque	3,500 Nm (2,580 lb-ft)

Features

- Compact design for efficient space utilization
- Ability to perform a wide range of brake performance tests
- ProLink Controls
- One Year Warranty on all refurbished components
