

# GLOBAL TEST SERVICES

LINK sets the standard for testing services. If it doesn't exist yet, we will build it. We're driven to provide you with customized solutions and the understanding that powers winning decisions. With over 80 years of testing experience and presence on four continents, you can draw on LINK's deep expertise to find a solution to meet your precise needs.

Whether you are stretching to new certification standards, checking structural integrity, or measuring performance, you need access to the smartest testing solutions in the industry. With LINK, you'll get the data you need: accurate, reliable, technical, and timely.

We operate 21 facilities in nine countries around the globe for manufacturing, sales, support and testing both in the laboratory and on the proving ground. Our capabilities are constantly growing as we incorporate emerging technologies and testing methodologies, such as EV and ADAS. We offer remarkable flexibility, comprehensive knowledge and actionable analysis as a vertically integrated testing provider unlike any other.

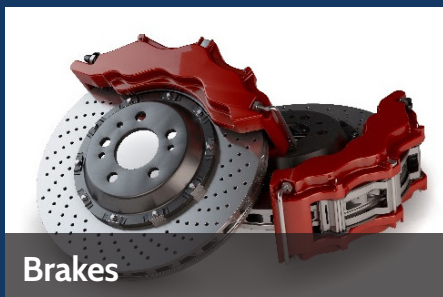

Tires

Wheels

Hubs/Bearings

Electric Motors

## Test Types

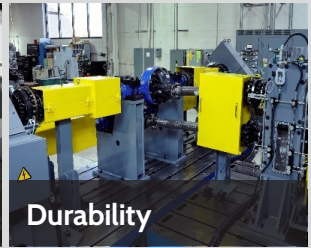

LINK offers every test type you need to drive decisions:

NVH

Performance

Durability

Structural/Fatigue

Cert/Type Approval

Environmental

Chemical

Metrology

## Laboratory Testing

The breadth and flexibility of our lab services are unmatched.

LINK provides comprehensive asset management for our customer's components and parts. Upon delivery to our facility, parts are either routed to our machine shop where fixtures are created

for laboratory testing, or sent directly to our vehicle test environment.

With scalable staffing, our team is ready to operate an on-site test in your facility. Put our expertise to work for you, and get the results you need.

Our quality certifications include:

- ISO/IEC 17025:2017
- ISO 9001:2015
- VESC-V3 Ameca Certified
- SAE J2975 Copper Free Better Brake Law

## Vehicle Testing

LINK is the premier provider of third-party testing for the global transportation industry, with turn-key vehicle testing solutions. You can expedite project completion by relying on us for laboratory, proving ground, and field testing on both passenger cars

and commercial vehicles.

Unlike others, LINK offers testing on public roads, proving grounds and off-road. LINK's industry knowledge is unequalled: we're ahead of the curve and ready to alert you to the next bend in the road, thanks to our leadership role

in multiple SAE and ISO working groups and task forces, UNECE GRPE PMP working groups, and our broad array of customers, along with extensive investments in research and development.

**Get a solution on demand – whatever the challenge.  
Test Smarter with LINK.**
